## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 56-61 and 68-69, drawn to method of using a modular control apparatus, classified in class 173, subclass 1.
- II. Claims 62 and 63, drawn to method of making modular control apparatus, classified in class 173, subclass 177.
- III. Claim 64, drawn to method making pneumatic power tool, classified in class 173, subclass 51.
- IV. Claim 67, drawn to method of making an apparatus, classified in class 173, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, II, II and Group IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions as set forth above in the four groups rely upon particulars for patentability, which are not set forth in the other groups.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Joseph Christian on 1/21/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3721

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
